A BENEDICTINE THRENODY.

[Some months ago we published one stanza—the first—of some verses addressed by Miles O'Reiley to General "Tony" Forsythe, of General Sheridan's staff, on his marriage with Miss Donnison, of Ohio. They were suggested to the Boy by the dreadful frequency with which he had observed accidents of this description to be happening to young bachelor officers of his acquaintance, since the termination of the war. As the first sanza appeared to be DRY GOODS! widely p pular, and as General Forsythe may by this time be in a condition to appreciate the balance, we have resolved to give the full matrimonial threnody, or lament, as originally writt n by Private Miles. Doubtless the eighth line of the fourth stanza makes reference to the steel-pointed Whitworth bults, made in England, with which our Our lady patrons in all the surrounding counties will find, this season, an unusually attractive stock iron-clads were peppered-four of them disabled. and one sunk-in Admiral Dupont's first attack upon Fort Sumter. - Edrs. N. Y. Citizen.] TO FORSYTHE PROM O'REILEY.

Suggested by the deplorable frequency of mi monial easualties to young officers of our quantance.]
They fall, my friends! the young, the proud,
The gray, the fes ive cusses fail—
An orange wreath instead of shroud,
A ring in lieu of minie ball;
The men who faced a battle's roar
Now yield to ruffied chemisettes,
And lion hearts bow down before
Some twilled, frilled pair of pantalettes.

And we who with them marched and slept, Sharing sdyance, retreat, attack—When revel on "salt-horse" we kept, Coffee, hard-bread, and apple-jack—Shail we not have one pitying breath For these, our comrades, as they go—Not happy to sandden death, But doomed to lingering lives of wee?

"Twas their own fault," the cynic cries,
"For if a moth witl seek the flame,
And scorch his wing until he dies—
Is it moth, or lamp, or both we blame?"
Ah, true, my friend! but think how long
These hapless moths through war's dark night,
When rains were chill, and winds were strong,
Had pushed their coid and lonely flight!

So when, at last, they saw the gl am,
And feit the warmth of woman's eyes—
Who blames them if they dreamed the dream
Which every moth in dreaming dies?
They were the youngest, tenderest kits,
And saw no snake beneath the flowers—
Nor knew that, un ler beauty's lids.
Dwelt bolts of more than Whitworth powers.

And now, my friend I with monning sore,
They yield the latch-key-and resign
The sacred corkscrow, which, of yore,
In every pocket used to shine;
And henceforth, it is known to each
Of this once gay and lestive band—
It matters not what rank they reach,
Their wives are in supreme command.

The strap with bar, or leaf, or bird—
But on the waves, to whom they cower,
Far higher brevets are conterred:
The throated frill, the scen ed glove,
The crimson lip, the throbbing breast,
The high commissions, signed by Love,
What slave of Hymen dares contest?

Ah, no! unhappy, it was theirs
To ride unburt through fields of strife;
But now—like rabbits caught in snares—
Each comrade yields him to a wife,
And, henceforth, epsulette, or sach.
Or chapeau-bras, or baldric bright,
Are nothing more than empty trash—
Their rank and file (not wives) to fight. For, higher than all flags that float,

Or all the stars on straps conterred.

Is woman's deathless potticest.

And woman's last appealing word!

In vain they strive—our comrades old—
Against the sway when first 'tis felt,—'Tis beauty's bower as slaves to hold

The hearts that once her power could melt. And so they fall—the young, the proud,
The gay, the festive curses fall—
An orange wreath instead of shroud,
A ring in lieu of minic ball;
The men who faced a battle's roar
Now yield to broidered chemisettes,
And lion-hearts bow down before
Bome twilled, frilled pair of pantalettes,

Tue Chicago Times of yesterday morning asserts that on Sunday, the 10th of January General Grant was shamefully drunk staggering through the streets of Washington, only being able to walk by the aid of his father-inlaw, General Dent.

The author of the celebrated saying that ilence is golden," must surely have been ttle addicted to mingling with his fellows on occasions of a festive soli; and, above all things, can never have been in the habit of playing the part of host. The posi tion of the giver of a feast, when the enter tainment is presided over by this same golden" spirit of silence, is a sufficiently listressing one. What pains will not be or she take to exorcise the evil genius, trying to lure the different guests on to speak of what they understand—the banker to discuss finance, the painter to hold forth on art, the Eastern traveller to treat of turbans and dromedaries? There are seasons, however, when all such efforts are fruitless, and when the silent influence seems to assert itself on the company with an irrisistible power which nothing can dispel. Most of us have, in our time, assisted at more than one social celebration which has been distinguished by a complete dearth of talk. We, most of us, know what pauses are at a dinner table; the silent influence, indeed, seems sometimes to act almost like a spell Every body wants to break it, but no body can succeed in doing so: or if they do. it is only for a very short time, and there is an almost immediate relapse. When some one, gifted with extraordinary nerve dares to make a remark in the midst of one of these awful pauses, what a sensation there so manages to diffuse, as it were, the moisture panied by a wife, who takes her tone from her husband, (being much afraid of him.) and so manages to diffuse, as it were, the moisture which comes from the original blanket, and is! All the members of that afflicted company look up eagerly; they rush at the new subject, as the ducks do at a morsel of role assists materially in damping the spirits of the assembled company. No doubt there are occasions when the inviting of a wet blanket when it is thrown into their pond. They pounce upon it tear it into little bits, which to partake of your hospitality is a necessity. He is a relative, or he is a person with whom each carries off with him and makes the most of in his own corner. And then, to continue you have business relations of a profitable character to yourself. For these or other our simile. just as it sometimes happens that the object cast into the duck pond is not a piece of bread, but a screw of paper, or a cork, or some other worthless object thrown in by a bystander out of mere idleness, and ter. you are obliged to ask him. Do so, then. since you must; but fail not, when you invite him to sit at your board, to take certain prefrom which the ducks turn away in disgust, cautions, by the adoption of which you may from which the ducks turn away in disgust, so it is very often with the subject so greedily pounced upon by these famished guests. It turns out not to be a subject really, to be a mere nothing when inspected closely, and is presently thrown aside as unavailable. It has been well observed "That nothing succeeds like success," and, something in the same way, it may be said that nothing makes materially diminish his power of doing mis-chief. First of all, you must remember that den, and not to a small one; and, secondly, when you have bidden him to your large party, and have got him on your bands, you must exercise all the discretion of which you same way, it may be said that nothing makes people so silent as silence. When once that people so silent as silence. When once that terrible influence has become established, its victims struggle against it in vain. In vain does the Amphitryon, from the bottom of his table, solicit the opinion of his artist guest on the merits of the Febberra. Her transfer of the febberra was a bigh place among his many qualifications for on the merits of the Exhibition. He makes some guarded reply, to the effect that it is a fair average show; and when pressed hard to say whether there is not some special work of more than ordinary merit on the Academy walls, he only answers in the negative, and in such a dry and forbidding tone as precluded that they look up from their plates. The best way to neutralize him is to place him surther questioning. Equally vain is the attempt to draw the traveler out. He is generally ready enough to hold forth, but on this ally ready enough to hold forth, but on the particular occasion he, too, is under the fatal influence; and when called upon to state in influence; and when called upon to state in other, that inestimable person (to dinner-other, that inestimable person (to dinner-other) the man who makes a noise. By fers from a sunset in England, replies, laco-nically, "More clouds in England;" and acting thus, you may really, in a great de straightway lapses back into silence. A conversational catastophe such as this is so distressing a thing, and is so entirely fatal to the success of any social celebration of what kind soever, that it really does seem worth while to attempt to find out what are the causes which operate most powerfully in bringing about such a state of things as has just been described. If we can but find out what it is that are productive of collective silence, beside those which we have already dealt with—atmakes people silent, we shall have advanced

more than half way toward the attainment of our great object—the discovery, namely, of thunder-storm brewing in the air, exhaustion our great object-the discovery, namely, of he best method of getting them to talk.

And now as to the collective silence of per kept too long without their dinners—these and the best method of getting them to talk. This distressing phenomenon may be attributable to a variety of causes. To begin with, the giver of the feast may be at fault. He may be young and inexperienced. He may want, namely, of tact and discretion on the part of the person who plays the host. If he part of the person who plays the host. be mistrustful of his cook, and, sitting speechless at the foot of his table, may exchange

A host afflicted with mis-givings of this sort will act as a wet blanket upon the company over which he presides.
and will not be only silent himself, but the
cause of silence in others. A man should examine himself before be undertakes that arduous part of host, as to whether he is capable duous part of host, as to whether he is capable of filing it properly. Can he maintain a calm exterior, he should ask himself, if the guests—things are likely to go very ill with soup should turn out to be burned, or retain him. The example of the master of the feast, when it happens that, wing to the causes given above, or any other, ne is rendered temporarily speechless, will most surely affect his company. The individuals of whom that company is composed will insensibly take their tone from their president, and the mere look of him, under uch circumstances, will be enough to queuch

But there are other influences beside those which are attributable to the deficiencies of in incapable bost, which have the effect of promoting silence among persons sitting at a reast. The meal itself, and its accessories Contested Will. may be in fault. There may not be enough, r-which is just as bad-the impression may be conveyed that there is not enough to eat. There may be hitches and failures in the working of the dinner machinery. These hings will produce pauses in the best regulaed companies. Insufficient light, again, is another cause of silence. Perhaps it acts upon the guests in the same way that the in sufficient dinner does, and conveys an idea of dearth. Any thing which does this, anything which suggests poverty, or gives an impres ion that the teast giver cannot afford to do is he is doing, is entirely fatal to every thing in the shape of talk. The fact is, that all sorts of small influences will operate to make people silent. They will often decline to talk the table around which they are assembled s too full, and an elbow conflict is kept up during the entire progress of the meal; while, on the other hand, if their chairs are set too children of this unfortunate class the daughfar apart, and they have to address each other across a sort of bridgeless chasm, they are still less likely to be conversationally dispossible less likely ed. All these, which some ignorant people would call small things, ought to be dwelt up would call small things, ought to be dwelt up man, Stephen Jumel by name, opened a winehooves him to bestow a prodigious amount of attention and study—the choice of his guests. himself weary of his bereaved existence, was touched on the shoulder, as he entered the house, by an aggrieved acquintance, who requested his company a short distance. Boon coming to an open field, the silent challenger paced off the approved distance, each drew his pistol, and, with the words, "Ready, fire!" the duel was commenced and ended. One went home with a stated jaw; the other crawled into the words of the company of a company in itself well assorted company, or a company in itself well assorted, but the members of which are respectively misplaced, are never to be depended upon to talk. If you ask people who are mutually unacquainted to sit together for two or three hours without stirring, you can never feel any sense of security that they will engage in conversation. It is hardly to be expected, indeed, that they should do so. Again, if your guests do happen to know each other, but are yet misplaced at table—persons An ill assorted company, or a company in it-self well assorted, but the members of which are respectively misplaced, are never to be depended upon to talk. If you ask people who are mutually unnequainted to sit together other, but are yet misplaced at table—persons who have no tastes in common, or, which is cheek by jowl-what have you to hope for? This is the danger of including among them a specimen of the wet-blanket tribe. It is in the power of one individual of this species to spoil the fun of as many as half a dezen comfortably-disposed guests; for it is in small assemblies that his power is so terminal assemblies in small assemblies that his power is so terribly felt. When he makes one of a larger party, it does not matter so much, as he can then only exercise his claimmy influence over one or two sufferers in his immediate vicinity; but in a small gathering, the presence of such a one is positively fatal. It is curious to observe, on such occasions, how gradually, but the property of Providence without are bowen. was in reality the illegitimate daughter one or two sufferers in his immediate vicinity; but in a small gathering, the presence of such a one is positiv ly fatal. > Beethoven's Moonlight Sonata. FROM THE GERMAN, BY AUBER FORESTIER.

Before taking the position of Court Organst at Vienna, Beethoven was living in his native city, Bonn, in the most straitened circumstances. All day he sat at the old worn piano, from which he never parted, or wrote ano, from which he never parted, or wrote is great tone creations, and only under cover in the prison of Spielberg has carried his

mplants there a feeling or deep sadness.' Beethoven pressed the hand of his friend.
"I must see this genius," he said, and without delay he entered the house, walking at once to the room whence the music proceeded. It was a little, shabbily furnished room upon the ground floor, only faintly lighted by lady who shares his joys and divides his troubles has just preceded the arrival of his broken piece of cundle. A young man sat the work-table. He was a shoemaker. Not ar from him stood a maiden, her arms rest ng upon the old harpsichord, and her head

ent downward. "Forgive me," said Beethoven to the shoe maker, who had sprung to his feet in sur-prise; "I heard music here, and I myself um He hesitated a moment, then proceeded:

"Let me play for you," said Beethoven, and without another word he seated himself before the harpsichord. He struck first a few simple chords, which gradually rose and swelled to symphonic form, and beneath the master touch, the worn, discordant instru-ment seemed to regain its original harmony. With ever increasing boldness and power did his phantasy find expression; now it was stormy and passionate, now wailing, dying away, melting into the tenderest tones.

Involuntarily all were spell-bound by the happy flights of imagination. The shoemaker

sat with his eyes fixed with wonder upon the stranger, his sister was lost in devotional Suddenly the lamp flickered up with a lurid glow, then went out. But Beethoven did not cease; doubtless he had forgotten the reali-ties about him. Softly the shoemaker stole to the window and pushed upon the shutters.

The glorious light as it beamed upon the keys must suddenly have broken the chain of Beethoven's ideas. He ceased playing bowed down his head, laid his hands upon his knees and seemed lost in thought. Finally the blind girl's brother stepped up to him and said in a tone of deep respect:

He played a few passages of the F major symphony, the one that had but now so exci-ted the blind girl. A cry of rapture rang from the maiden's lips ... You are Beethoven! Oh, my God! Oh,

The master looked up greatly affected into the pleading face of the afflicted girl. Then a flash of lightning crossed the starry heavens of his brain; the fingers once more fell upon of his brain; the fingers once more fell upon the keys. Deep, mournful, stormy was the melody that now arose from the instrument, then followed a passage of light, almost wan the model of the storm of then followed a passage of light, almost wan-ton coloring, like the dance of sportive elfs by midnight upon the surf, or on a desert island in the midst of the surging ocean. rich, unquestioning ardors of reverence and fondness were as sucredly guided as the move ments of Mignon, dancing blindfo'd amidst the the egrs, with never a false st-p. Goethe's con-duct towards the trustful and impassioned girl was exceedingly discreet in its mingled kind tenants and purchasers as well as the earl profession. How shall they solve these knotty younts? or, in other words, who shall be heir? Is it not a strange circumstance that astute is wyers should now be tracking up a brace of loose women who walked the streets in misery seventy years ago, and should be searching the records of pro titution and crime to find an owner for a million of dollars?

Thus Bettine writes from the strange fulness of her mind, in mystic language, 'o Goethe's mother: 'Would that I sat, a beggar child, before his door, and took a piece of bread fit. Chase having broken the will, obtains, as he sapposes, the estate, not through his wife.

And it is doubtful whether any one suspected it. Chase having broken the will, obtains, as he sapposes, the estate, not through his wife. Whom all knew to be illegitimate, but through his purchase of the Jones' heriship. A third Richmond now appears, and Chase must hurry home from Europe to meet and resist a claim for this vast property. We have said that these sisters had a brother, John Bowen, who ded young. But is this a fact? "No, it is false," cry the plaintiffs. It was his F major symphony, played with the most astonishing fire and expression upon an old wiry harpsichord.

Suddenly, while Beethoven and his friend stood listening, the music ceased, and through the window out into the street, where they stood, they heard a suppressed sigh, and the voice of a young girl broke the stillness of the poor of her native city, an assiduous visitor of the jails, a saintly benefactress to all the unhappy whom her charities could reach, drawn to him by a strong interest of respect and pity, gave him a home in her house, and supplied him with congenial employment. Pellico gratefully appreciated her goodness to him, and deeply reverenced her worth. In works of religion and beneficence their lives moved on. He began to write a memoir of his friend; but left it, a fragment, when his lingering consumption brought him to the street that they handred. "I can play no more, brother. Some other grave. Correggio;" and under that name, he became and died in 1534; and one of his last produc-tions was the small but famous picture, the "Reading Magdalena," now in the possession of the Dresden Art Gallery.

Correggio is not known to have had much

schooling in art, nor is he known ever to have visited even Rome (the only great centre of art-study at that time); he probably never knew the great painters of his age but through their works: yet, by the force of his genius, he equal, in form, of Michael Angelo's, in expression, of Raphael's, in color, of Titian's. Like ost artists of his time, he painted principal for churches and monasteries; but through all his works, even those of the me character, a vein of good humor, of kindly, hu mane feeling, and of love for the beautiful in man, is perceptible. His Madounas and his Saints, in expression chaste and tender, full dignity and holiness, are resplandent with li e and earthly beauty; and his keading mounds where the grass is fresh with the Migdalena is considered to be one of the most watering of tears. DURING PRICE'S raid into Missouri, in 1864, skirmish took place on the line of Chariton and Howard Counties, in which one of the rebs was left on the ground dangerously wounded in the neck. While in this condition Miss Sarah J. Smith, a school teacher in the vicinity, happened to pass by. Seeing the wounded man, she went to him and staunched his wounds, probably saving his life. She re mained with him until near nightfall, when he requested her to leave, as his companions would probably come at night and take him away. It not, she would find him there in the morning, living or dead. He said that be was known by the name of Tucker, but that his real name was H. C. McDonald, and that he was from Louisville, Kentucky. Goethe, in the course of his life, stood in the most intimate relations with a large number of the rarest women. Few men have ever appreciated female character so well. No one has exhibited their virtues, and pleaded their cause with a more impressive combination of insight, sympathy, and veneration His many sins toward women deserve severe condemnation and rebuke, but it is an outrageous wrong towards his noble genius to limit attention, as so many critics do, to that aspect of the case. The wondering love and study which Frederike, Lili, and others drew from most difficult topics playfully and yet with the profoundest ability. His controversial talent was a formidable weapon, but he adorned it with wit and grace, as soldiers on holilays place roses in the muzzle of their musto anger, was as caustic as frozen mercury. In terseness and incisiveness and vigor of yle, epigrammatic point, and keen antihesis, we do not know his superior, hardly his equal, in all the American press. The writer urged Gov. STEVENSON to take measures ington, Ky., to Catlettsburg and connecting at the latter point with the Chesapeake and Ohio. We learn also from Mr. STANTON that while in Frankfort he drew up bills to enable the counties of Kenton, Campbell, Bracken, Lewis, Greenup and Boyd to take stock in this road, and that these bills either have passed or will speedily pass through the General Assembly and be approved by the Governor. The road would pass through Maysville, and give us a connection with the nearest seaport, besides bringing us within three hours ride, by rail, of Cincinnati. If this project shall be carried out, as we do not doubt it will be, the results will verify all the predictions made by the friends of the Maysville and Lexington Railroad when advocating the tax. Mason county has so large a load to carry at present that she will not be able to contribute much to the enterprise but we can promise a liberal private subscription to the road from this city so soon as it shall be placed on a practical and living basis. The cities of Maysville, Newport, Covington and Louisville in Kentucky, and of Portsmouth and Cincinnati, in Ohio, are deeply interested in the early completion of this road, and they will not suffer it to be delayed many years. Our friends in Fleming, Nicholas, Bourbon and advantages such a road will give to them, and they must take prompt measures to embrace these advantages by building the road from Maysville to Paris.

At the time of writing the above we were not aware that the letter referred to was in Mr. STANTON's possession. However, we find it in the Bulletin of this morning, and reproduce it. Here it is: LEXINGTON, Va., Jan. 10th, 1868.

# THE APPELLATE JUDGESHIP.

In another column we publish the announcement of Hon. B. J. PETERS as a candidate for re-election to the Court of Appeals from this Appellate District. There are men in this district whom we would prefer to see elected to this position to Judge PETERS, but of these some would not have the place and others have not the slightest prospect of getting it. Of those who have been mentioned in connection with the office and of whose nomination there is any reason to hope, our preference is decidedly for Judge PETERS. Of all the men of his branch in the Democratic party he has, perhaps, been the most moderate. ligations as a citizen and an officer. It is due to him to say that his conduct on the tent-strong, calm, self-poised, alert-a Bench has been marked by dignity and impartiality, and that whatever his sympathies may have been he has not obtruded them into questions arising out of the war which came before him for judicial decision. Judge PETERS can scarcely be called a great jurist, but he has made himself quite a respectable lawyer, and he has certainly been honest in the discharge of official duty. As a citizen and a man his reputation is unblemished, and his public and private character is such that or unwary toeman; for even as he we can support him cheerfully. We hope he may get the nomination of the Democratic party, but we would as readily support him without that nomination;and, in fact, if our own wishes were consulted, politics would not be introduced into the race, but the canvays be made g'rictly upon questions of qualification and fitness for the position.

If there was any disposition manifested in the Democratic meeting on Saturday to eaub National Democrats, who carried the flag of the party in its days of trial in Kentucky, the fault was not that of the masses. We never saw a meeting in which the people had really so little voice, or one in which such plain efforts were made to prevent that voice from being heard or the wishes of the multitude being carried out. Tuck. Opposition was futile; resistance Everything had been secretly and privily arranged before the meeting, and all the proceedings were conducted accordingly. To much of it the people objected, but they had been too well drilled in the discipline of party to give their murmurs distinet utterance. But the young Democracy exhibit decided indications of kicking out of the traces, and we predict that the time is fast approaching when they will make a vigorous and gallant effort to emancipate themselves from the despotism of that leadership which is blind to the present and clings to the obsolete issues of the buried past. The Drudge. There is many a drudge who commences life as one, who continues to be one through his youth and manhood—drudges on in his declining days, and dies, bowed down by a life time of hard labor, his rest for years preceding his demise having been broken by a chronic cough, and his locomotive powers impeded by long standing, settled and painful rheumatism.

A drudge has had it instilled into his mind by education and by religion, by example and precept, that every man ought to earn his bread by the "swent of his brow,"—that, by right, every man should labor with his hands to the full extent of his bodily power.

The drudge works on, and as a farmer soon relies on his power of enduring hard labor to carry him on to a state of independence, and if a temperate man and economical, he will accumulate sufficient property to end his days in ease and peace; but the habit has so settled on the good old soul, that he cannot rest by day or night—he must be doing some thing, and in spite of cough and rheumatism, work he must and work he will, and so he lives and so he dies, a drudge. If this man has aught to sell, he will take it to a store, or take what is offered by some drover, and being but little acquainted with market rates. and having no opportunity of acquiring any cor-rect judgment in trading, he probably loses more than enough in this way to pay an extra farm laborer all the year round. Industry is undoubtedly a virtue of the first

order, but many a man supposes it only applies to bodily labor, and many men have passed through life in insignificance, who, by ndustriously cultivating their minds, might have risen to eminence, and done much more to benefit their fellow beings; and probably their application of mind, wisely directed would have been of very great advantage to osterity. Thus every parent is sadly de-icient in proper teeling, if he does not give his children the chance to expand their minds as well as to develop their muscle, and any man or set of men who only keep a school onen for two or three months in the year, an that at a time when the weather is too inclement for constant attendance, ought to be scouted by the best society, as a mean, temptible crew. The drudge says: "I had little education, and I have my farm free of mortgage, and so have a dozen of my acquaintances; therefore, depend upon it, you will unfit your boy for work by so much learn-

There are men, though, worse than the drudge-men who, by inheritance or by some lucky circumstance, have come into wealth, who think that because they are fortunate, every body less so, ought to drudge and be kept down. CULTURE OF CELERY.

It is easy to raise and preserve this vegetable, and the taste for it is so much increased by use, that we are surprised that it is not grown in every garden. We set out our plants in trenches rather late, and hill up for the last three or four weeks. Late in the fall in a dry day we gather the plants, pressing the stalks of each one together to keep out the dirt, and set them out as near as possible together in boxes in the cellar, in earth taken from the garden, heaping it up to the top of the plant. In this way the plant keeps alive, and continues to branch and is ready for use any time in the winter. This year we neglected to get in our plants till the ground was pretty well frozen, and they were covered with snow. We broke off the frozen earth on each side, and took out the plants. finding them not frezen except the leaves at the top, and they are doing as well as ever in our cellar. If any ope has not been used to celery much, let him use it a little, and particularly at dinner or breakfast occasionally, with a little salt, and he will go to salads quickly up our corn, peas, beans or potatoes in our garden as our celery. We are aware that the use of celery is general now beat it but the use of celery is general now, but like the use of tomatoes it should be universal. It is a good winter vegetable, always at hand when the variety of other vegetables is not large, and, therefore, the more valuable for that.

# STATE NEWS.

RURALIS?

ST. LEGER GRENFEL -A petition to the President has been prepared and signed by a large majority of the members of the Legislature. asking that this chivalrous and gallant Englishman may be pardoned and restored to his friends .- Lez. Gazette.

SEVEN negro women and girls created quite a disturbance on the hill Tuesday night, which resulted in the whole party being arrested and confined in jail. One of the negresses had purchased a bottle of whisky, and on entering the kitchen of the house where she was employed, pretended as though she was drunk Preston, Wood & Co., -rolling on the floor and making a great deal of noise, when her mother let into her with a board creating a general fight and melee among the whole party, and alarming the neighborhood, which attracted the police and caused the arrest of the parties. They were each amused to the tune of \$10 and costs .-Lez. Statesman, 30th.

PROMOTED .- Lieut. John H. Todd, of the United States cavalry, and a resident of Frankfort, has, we learn, been promoted to first Lieutenant of the same regiment. Lieutenant Todd was a late Captain in the volunteer service, and was married about a year since to the beautiful and accomplished Miss Bonnie Broadhead, who charmed the many visitors to the capitol for several winters, by ber lovely and fascinating manners. We congratulate the Captain upon his promotion, and the Government upon baving the services of so gallant an officer. - Ibid.

HON. BRUTUS J. CLAY, ex-member of Corgress, passed through the city on Tuesday lest, from Mississippi on his way to Bourbor. He gave a gloomy description of affairs down South. He seems to be enjoying fine health, and is looking as stalwart as ever .- Ibid.

VERDICT IN THE BURBRIDGE CASE.—The jury in the case of Oscar H. Burbridge, who was tried in the Criminal Court in Covington, Ky., on the charge of shooting A. J. Morey with intent to kill, brought in a verdict of not guilty, and the prisoner was accordingly discharged .- Ibid.

News has reached this city of the death of Dr. John W. Jackson, in Georgia, at the hands of his son, John W. Jackson. jr. The newspaper account say he was killed in a family altereation. Dr. Jackson was a man of violent temper, and occasionally treated his family with great roughness. Doubtle: s in one of these fits of passion he had com menced the altercation which terminated so sadly. Dr. Jackson was a man of some prominence in this State. In 1860 he was a Douglas elector for this district, but soon after the election of Mr. Lincoln espoused the rebel cause. He left the State in 1862, with rebel cause. He left the State in 1862, with Kirby Smith, but did not enter the army. He returned to Lexington in 1865, and remained about one year, then returned South. His wife, a most estimable lady, is the daughter of the late Col. Henry C. Payne.-Ibid.
